How it works

Extract and Validate:
Claims data is extracted and validated across documents for accuracy and correctness.

Processing Essentials:
All of the key information necessary to process a claim is identified.

Managing by exception:
Missing information is automatically flagged and coverage is verified.

Contextualised data:
Claims descriptions are mapped to categories or codes and confidence levels are provided.

Easy claims handling:
A full claims view provides centralising claims data and findings.

Key Benefits

Reduced workload:
Free up your time for high-impact tasks as we take over manual process

Reliable results:
Our platform minimises errors and biases, with a 97% accuracy rate.

Swift document processing:
Say goodbye to delays with rapid documentation extraction.

Improved customer experience:
Rapid, precise decision boost customer satisfaction and NPS.

Consistent precision:
Ensure each claim is handled with the same level of accuracy, reducing the risk of mistakes or discrepancies.

Comprehensive analysis:
Ensure all data required for claim analysis or completion is present reducing the risk of incomplete claims.

Proven track record

Already used by leading insurers across the globe.

Effortless integration

Seamlessly incorporate our tool into your existing infrastructure.

Dedicated to Claims

We've build our AI models and team specifically for claims.

“ We selected Sprout.ai as our partner as they have demonstrated that their technology and approach can take us one step forward in our digitalisation and efficiency journey. ” Sergio Melro, COO AdvanceCare
